## ABOUT ME

A self-taught programmer with passion. I love taking on new challenges and solving problems. I can easily work individually or as a team member. Determination and hard work are the words that describe me best. My main focus right now is to improve my programming skills - that is why I am looking forward to be involved in real, commercial projects. I am a quick learner who is not afraid of taking new knowledge. Beside programming, I also fulfill myself as an athlete and filmmaker.

## PROJECTS

### Projects from current work:

CRIMCON

MENTORING IT

FACULTY OF COMPUTER SCIENCE PAGE

What am I doing? What I learned?
